---

## PROFILE

---

I am a web developer specializing in backend development with solid experience in JavaScript and PHP, and knowledge of frameworks such as Laravel and NestJS. Although my primary focus is backend development, I also handle frontend technologies such as ReactJS, VueJS, and NextJS, allowing me to contribute to full-stack projects. In addition to programming, I am very interested in infrastructure and automation. I currently hold the *AWS Certified Cloud Practitioner* certification and have sufficient knowledge to deploy an application on AWS.

---

## PROFESIONAL EXPERIENCE

---

**Twistic Digital** | Fullstack Developer Gran Canarias, Spain (Hybrid) | **10/2024 - Present**
